

Table. Cross-database comparison — six biographical datasets.

Dimension	Cultura	Cross-Verified	Pantheon 2	HBR	Schich 2014	Chaney 2024
Total individuals	13,003,420	2,291,817	126,582	7,015,353	120,211	537,247
With polity / citizenship	6,128,228	2,238,318	123,104	5,443,212	—	486,179
With floruit / birth-or-death date	8,653,557	2,140,640	125,324	4,239,378	120,211	537,247
With occupation	9,032,397	2,276,400	126,520	5,324,653	—	537,247
Only in non-Western Wikipedia	938,970	169	—	—	—	—
Only in non-Western catalogs	258,236	N/A	—	—	—	—
Only in non-Western sources (wiki u catalog)	865,427	169 (wiki only)	—	—	—	—
Number of individuals linked to a polity	6,128,228	N/A	123,104	5,443,212	—	486,179
Number of individuals with a date	8,653,557	2,140,640	125,324	4,239,378	120,211	537,247
Number of individuals with an occupation	9,032,397	2,276,400	126,520	5,324,653	—	537,247

Cultura, Cross-Verified, Pantheon 2.0: counts computed directly from the underlying data files (humans_clean.duckdb / *.csv.gz / person_2025_update.csv). HBR: derived from Nekoei & Sinn (2020) Table 1 (n = 7,015,353; coverage shares applied). Schich (2014): the FB sub-dataset used for the migration network — by construction every individual has both birth and death locations. Chaney (2024): VIAF-derived authors after cleaning, Europe + MENA only. Em-dashes mark dimensions not represented in the source database (see docs/comparison_databases_sources.md).
